C:\Users\mypha> cd C:\Users\mypha\OneDrive\Desktop\Blockchain-Tools
C:\Users\mypha\OneDrive\Desktop\Blockchain-Tools> .\puppeth

Welcome to puppeth, your Ethereum private network manager

This tool lets you create a new Ethereum network down to
the genesis block, bootnodes, miners and ethstats servers
without the hassle that it would normally entail.

Puppeth uses SSH to dial in to remote servers, and builds
its network components out of Docker containers using the
docker-compose toolset.

Please specify a network name to administer (no spaces, hyphens or capital letters, please)
> homeworknet

Sweet, you can set this via --network=homeworknet next time!

INFO [07-01|10:42:56.800] Administering Ethereum network
WARN [07-01|10:42:56.801] No previous configurations found
mypha\puppeth\homeworknet

What would you like to do? (default = stats)
1. Show network stats
2. Configure new genesis
3. Track new remote server
4. Deploy network components
> 2

What would you like to do? (default = create)
1. Create new genesis from scratch
2. Import already existing genesis
> 1

Which consensus engine to use? (default = clique)
1. Ethash - proof-of-work
2. Clique - proof-of-authority
> 2

How many seconds should blocks take? (default = 15)
> 3

Which accounts are allowed to seal? (mandatory at least one)

```

```
